SIOP Asia 2024

Welcome Message

Dear friends and colleagues,

We are delighted to invite you to the 16th Congress of Asia continental branch of International Society of Paediatric Oncology (SIOP Asia 2024), hosted by the Children's Cancer Center, National Center for Child Health and Development.

The International Society of Paediatric Oncology (SIOP), founded in 1969, is dedicated to study and addressing the challenges faced by children and young adults diagnosed with cancer. It is a worldwide society with over 3,000 members that holds international general meetings. Its Asian branch, SIOP Asia, held its first general meeting in Singapore in 2000 and has continued to hold annual meetings since 2014, contributing to advancements of childhood cancer care in the Asian region.

SIOP's goal is that *"no child should die of cancer."* With the mission to ensure that children and young adults diagnosed with cancer receive the promising treatment and care, SIOP is deeply engaged in a variety of activities around the world. Japanese medical professionals, in particular, are engaged in cutting-edge research and education in the field of pediatric oncology. In addition, the World Health Organization (WHO), through its Global Initiative for Childhood Cancer (GICC), is working to increase the global childhood cancer cure rate to 60% by 2030, including developing countries.

The SIOP Asia Congress in Yokohama, is led and managed by the Children's Cancer Center, National Center for Child Health and Development, Japan's sole national children's hospital. This effort is undertaken in collaboration with esteemed organizations such as the Japanese Society of Pediatric Hematology/Oncology (JSPHO), the Japan Children's Cancer Group (JCCG), the Children's Cancer Association of Japan, and the NPO Magokoro Organization for Childhood Cancer. The theme of the congress is "You raise it up!", conveying the importance that we should all support childhood cancer patients together. Through this international congress, we aim to deepen collaboration among researchers in Japan and overseas, to further promote childhood cancer treatment and research together with pediatric cancer researchers in Asian countries, and to make a significant contribution to the development of medical care in the field of childhood cancer in Japan and around the world through the results of this conference.

We are honored to be hosting this international congress on pediatric oncology. The SIOP Asia 2024 focuses on long-term follow-up of childhood cancer survivors, cutting-edge medicine including genomic medicine for childhood cancer, neuroblastoma, Langerhans cell histiocytosis, and many other childhood cancers.

We encourage you to fully explore the scientific programs and attend other exceptional segments of the meeting such as St. Jude Global meeting, APHOG Annual Meeting, Nursing Session, and 16th CCI Asia Conference.

Asian Pediatric Hematology and Oncology Group (APHOG)

The journey of Asian Pediatric Hematology and Oncology Group (APHOG) started back to 2012 when the SIOP Asia 2012 Congress was held in Yogyakarta, Indonesia. The leaders of pediatric hematology and oncology in Asia gathered in a small room where we discussed on how we Asian leaders should work together for improving the cure rate and even the care levels for the survivors of childhood cancer in Asia. This was because more than a half of children with cancer in the world occur in Asia with very poor outcome.

In March, 2021, APHOG was finally and officially founded with a help of NGO-Magokoro Organization for Childhood Cancer (MOCC) which supports financial and official issues of APHOG. APHOG acts as an action team of SIOP Asia, just like a Chinese proverb "Two-Wheels of a Cart".

The Executive Council should establish the structure of APHOG as well as to start its practical activities in collaboration with SIOP, SIOP Asia, WHO and other global societies like St. Jude Global, etc. In the APHOG Advisory Board, the leaders of main collaborative children's cancer clinical study groups in Asia (INPHOG, ThaiPOG, TPOG, CCCG, KPHOG, JCCG and RSPOH) have already joined us. Nomination of the representatives of each Asian country is going on according to the SIOP global mapping of Asia. Your joining is very welcome.

Current actions and events; the APHOG Annual Meeting with the General Assembly, the event of "WHO Global Initiative for Childhood Cancer (WHO GICC) in Tokyo", the "APHOG/SIOP Asia Joint Scientific Symposium" (virtual), and the "APHOG Global Seminar" (virtual). The completion of the APHOG structure including several committees as well as setting the practical clinical study protocols is on the way.

St. Jude Global

St. Jude Global

St. Jude Global brings together individuals and institutions dedicated to improving quality of care and increasing survival rates worldwide for children with cancer and other catastrophic diseases. Through this initiative, St. Jude has made a commitment to fulfilling the founding vision of the institution: that no child should die in the dawn of life. St. Jude Global is organized into seven regional programs and a growing number of transversal programs, integrating research, innovation, and advanced education with program and capacity building. The St. Jude Global Alliance brings together more than 200 member institutions and foundations that are committed to addressing disparities in access to diagnosis and care around the world. St. Jude is the only WHO Collaborating Centre for Childhood Cancer and has partnered with WHO to create the Global Initiative for Childhood Cancer and is developing the Global Platform for Access to Childhood Cancer Medicines to address the inconsistent availability of quality essential cancer medicines.

St. Jude Global Asia Pacific Regional Program and American Lebanese Syrian Associated Charities (ALSAC) are co-hosting a Regional Meeting in collaboration with key regional partners prior to SIOP Asia 2024 Conference. St. Jude Global Asia Pacific is proud to also co-develop and lead sessions at SIOP Asia for a St. Jude Global Showcase, lead technical content and engage faculty for the Educational Day, and support planning for the Joint Symposium with APHOG and SIOP Asia.

The International Society of Paediatric Surgical Oncology (IPSO)

IPSO is an international society of surgeons who specialize in the surgical care of children with cancer. IPSO is a truly global organization, with an expanding membership from all parts of the world.

IPSO regional continental meetings run often throughout the calendar year being held in partnership with SIOP across different nations notably SIOP Asia, SIOP Africa, SIOP Latin America as listed examples. These forums regularly update our global members with the latest developments in pediatric surgical oncology pertinent to clinical practice.

IPSO members are now currently listed in some 362 major cities in 87 countries across 5 world continents. Among them, there is an important representation of members living in Asia, with 102 cities in 30 countries represented in this continent.

Membership is open to all surgeons who have a demonstrable commitment to pediatric surgical oncology, and the society is always keen to attract new members.

Childhood Cancer International ASIA

Childhood Cancer International Asia (CCI Asia) is one of the five regions of Childhood Cancer International (CCI) with the largest population. CCI was founded in 1994, as an umbrella organization of childhood cancer grassroots and national parent organizations. Today, CCI is the largest patient support organization for childhood cancer. It is a global, parent-driven non-profit that represents more than 180 parent organizations, childhood cancer survivor associations, childhood cancer support groups, and cancer societies, in over 90 countries, across 6 continents. (<https://www.childhoodcancerinternational.org/about-cci>)

The collaboration between SIOP Asia and CCI Asia dated back to the year of 2006 in Shanghai, marking the first CCI Asia conference held in conjunction with SIOP Asia conference. By then the SIOP Asia Conference LOC Chair and SIOP-Asia President, Dr Wang Yaoping, provided great support and made pivotal contributions to make it possible.

This collaboration laid an excellent foundation for future CCI Asia conferences in conjunction with SIOP Asia conferences, including 2008 Muscat, 2012 Jogjakarta, 2014 Seoul, 2015 Amman, 2016 Moscow, 2017 Bangkok, 2019 Abu Dhabi, 2021 Mumbai, 2022 Guangzhou, 2024 Yokohama.

CCI Asia has maintained a close working relationship with all SIOP Asia Presidents, starting from the late Dr Wang Yaoping, followed by Dr Purna Kurkure, Dr Akira Nakagawara, Dr Chi-Kong Li, Dr Rashmi Dalvi, and currently Dr Hiroki Hori. This partnership has ensured that CCI Asia is consistently invited to participate in the annual SIOP Asia meetings, enabling the sharing of CCI Asia activities whenever possible.

SIOP Asia 2024

Japanese Society of Pediatric Oncology Nursing (JSPON)

The Japan Society of Pediatric Oncology Nursing (JSPON) is the only academic society in Japan involved in nursing researchers and practitioners working with children with cancer and their families. JSPON organizes academic conferences, seminars, and e-learning to help nurses supporting children with cancer and their families to acquire advanced knowledge and skills. Additionally, aiming to improve the QOL for these children and their families, board members developed the "Pediatric Cancer Nursing Care Guidelines" through the research.

JSPON's current and former presidents and members of the International Exchange Committee and the first president of JSPON are also participating as Local of Committee nursing members of SIOP Asia 2024. We are planning an attractive program for nurses in Asia, including pediatric oncology nursing up-to-date, pain management, end-of-life care, and measures against exposure to antineoplastic agents.

We hope you will all come to Japan in good season and enjoy not only the program but also the sightseeing.

子どもたちの笑顔のために、 続けてきたことがある、始めていくことがある。

小児がんは15歳未満の子どもに起こる悪性腫瘍の総称です。大人と比べて入院日数が長期にわたることが多く、自宅から離れた病院で闘病生活を送らなければならないこともあります。アフラックはこれまでも、社員・アソシエイツ（販売代理店）がひとつになって、小児がんの子どもたちとご家族を支えるさまざまな活動を続けてきました。そして2019年から、My Special Aflac Duckを通じて新しい活動を始めています。

ハートリンク共済の収益金は
晩期合併症のある就労困難な、
小児がん経験者の就労支援に助成しています。

生命保険をはじめとする民間の保険に小児がん経験者が入れない現状を、何とかしようと、経験者の親たちが立ち上がりました。「共済型の保障を自分たちで作ってしまおう」。意気を感じた世界一流の再保険会社がバックアップしてくれることになり、経験者とその家族だけでなく、医療者、友人など誰でも「おうえんプラン」に参加できるようになりました。ローリスク、ローリターンではありますが、小児がん経験者を含めた誰でもが保障を受けられるようになった始めの一歩です。子どもたちのために大切な寄付文化を一味違ったスタイルで日本に根付かせましょう。ほくも会員になり応援しています。

ハートリンクの ハートリンク共済

ご加入者の声

現在、日本では一度小児がんを経験すると、医療保険の加入は困難だ。がん保険となれば加入を拒否される。自立するためには絶対欠かせない医療費の保障なので、何か良い方法はないかと探し、見つけたのが「ハートリンク共済」だった。38年経ち、二次がんを発症しハートリンク共済から保障を受け、経済的に助かり、将来の不安を軽減でき、安心して自分の道を進むことができている。

千葉県 井上 領さん

ハートリンクとは？

ハートリンクは、相互扶助の精神に基づき、過去に小児がんにかかった会員の福利厚生のために必要な事業を行い、会員の福利の増進と自主的な経済活動を促進し、かつ、その経済的な地位ならびに生活環境の向上を図ることを目的として設立された団体です。白血病などの小児がんを克服し、現在、健康な学校生活や社会生活を営んでいる人たちがお申込みいただける共済制度を立ち上げました。

現在日本では、小児がんを経験した人たちの加入できる医療保障型の生命保険がほとんどないため、同じ体験をした人達で共に助け合い、不慮の事故や病気などで入院したときに保障を受ける事ができる当共済制度、また、そのリスクを補うための一般を対象とした「おうえんプラン」の運営に、皆さまのご理解とご賛同をいただけますよう、よろしく願いいたします。
